

IKEUCHI's Energy Saving Spray Nozzles

For manufacturing of electronic products

Over a wide range of wet processes, including printed circuit boards, TAB, BGA, LCDs, and more, we have a strong track record of proven results.

IKEUCHI spray nozzles hold the key to ever-increasing precision and miniaturization in electronic product manufacturing.

Spray Nozzles for each process

Polishing

UVVP series

For Polishing >>> Highly Wear-Resistant Nozzles

- UVVP series (Made of ultra molecular polyethylene, standard flat spray)

Developing

JJXP-PVDF series

For Developing >>> Precision Developing Nozzles

- LYYP series (Ultra-low pressure, wide-angle flat spray)
- JJXP-HTPVC series (Made of HTPVC, full cone spray)
- JJXP-PVDF series (Made of PVDF, full cone spray)
- SSXP-HTPVC series (Made of HTPVC, square spray)
- INVV, INJJX series (Quick detachable type, flat or full cone spray)

Etching

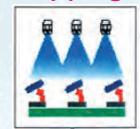

INVV series INJJX series INJJX-Y series

For Etching >>> Easy Maintenance Nozzles with Uniform Etching Effect

- VVEA series (Pneumatic nozzle for fine fog etching & water savings)
- INJJX-Y series (Quick detachable type, easy maintenance)
- JJXP-HTPVC series (Small to medium spray capacity suitable for
- JJXP-PVDF small products)
- SSXP-HTPVC series (Made of HTPVC, square full cone spray)

Stripping

AJP-PPS series

For Stripping >>> Chemical-Resistant Nozzles

- AJP-PPS series (Minimal clogging, full cone spray)
- VVP-PP series (Made of PP, standard flat spray nozzles)
- MOMOJet® series (Self-cleaning, flat spray)
- INVV, INJJX(-Y) series (Quick detachable type, flat or full cone spray)

Precise Cleaning

WVP-PP series VVEA series

For Cleaning >>> Water-Saving Nozzles INVV, INJJX

- INVV, INJJX series (Quick detachable type, flat or full cone spray)
- YYP series (Wide angle flat spray)
- VVP-PP series (Made of PP, standard flat spray nozzles)
- BIM series (Pneumatic nozzle for precise cleaning & water savings)
- VVEA series (Pneumatic nozzle, high impact flat spray)
- PSN series (Pneumatic slit-laminar nozzle)

Blow-off Drying

TAIJUJet®

SLNB series

For Drying >>> Energy Saving Air Blow Nozzles

- TAIJUJet® series (Plastic air booster nozzle multiplying supplied air)
- VZ series (Wide angle air nozzle)
- SLNHA-H series (Slit air knife, applicable for large products)
- SLNB series (Energy-saving slit nozzles utilizing blower air)
